NEW DIY
PRODUCT

AB[®] COURTYARD

AB® Courtyard

AB® Courtyard is a unique DIY walling system which allows you to construct custom creations at your home!

Build patio walls, front fences, fire pits, entrance monuments, bench seats, BBQ areas and much more! Your home improvement project is only limited by your imagination!

RECOMMENDED FOR

Curved Wall

Circular Wall

Straight Wall

Fences

Garden
Bench Seat

Piers

Custom
Creations

COMPONENTS

AB® Courtyard Dublin
15.87 units per m²

AB® Courtyard York

AB® Courtyard Corner

AB® Courtyard Cap
4.82 units per L/m (straight walls)

AB® Courtyard Pier Cap (Two per pier)

FEATURES

- ✓ Build Double sided free standing walls
- ✓ Build directly onto existing pavements – no need to excavate.
- ✓ Build freestanding walls to 750mm high and piers to 900mm high plus caps!
- ✓ Can be used for soil retaining walls and garden beds to 300mm in height
- ✓ Blocks feature raised rings and tapered edges so they easily stack together!

COLOUR OPTIONS

SANDSTONE

BLUESTONE

Whilst these swatches provide a good indication of the products colour, you should always sight product samples before use. Due to natural variations in aggregates, colours may vary.

*All components are sold individually.
To create walls of random appearance or designs which use multiple components, they must each be ordered individually!*

Jason's Courtyard tricks

Follow these hints and tips to ensure your AB® Courtyard project is a success

Maximum Freestanding Wall height:
750mm (5 courses) for freestanding walls!

Maximum Pier Height:
900mm (6 courses)

Maximum Height for Retaining Wall:
300mm (two courses). This is the maximum height for applications retaining soil including planter boxes and veggie patches!

The APP is an essential first starting point for your custom project!
Always use the "estimating" feature on the app before building!

STARTING TIPS!

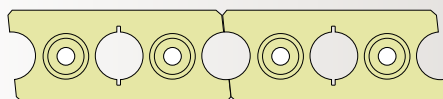

When building directly atop an existing paved or concrete surface, ensure the area is flat!

In these applications, you do not need to glue blocks to the existing surface, the weight of the blocks will hold the wall in place, though if you wish for extra support, you can use a landscape grade adhesive to secure units onto the existing flat surface.

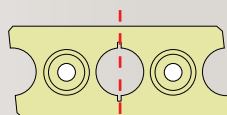

COMPONENTS AND STARTING INSTRUCTIONS - Can cut blocks using either brick saw or hammer & bolster.

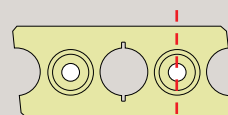

AB® Courtyard Dublin

Straight walls

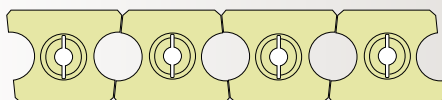

Cut for 1/2 block

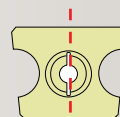

Cut for 3/4 & 1/4 block

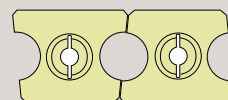

AB® Courtyard York

Straight walls - alternate each block

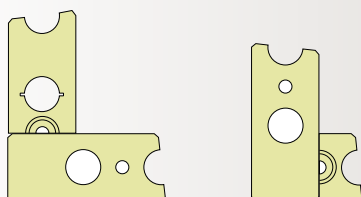

Cut for 1/2 block

Two are equivalent to one AB® Courtyard Dublin

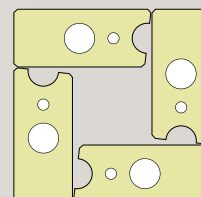

AB® Courtyard Corner

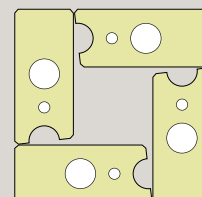

Create corners using cut AB® Courtyard Dublin

Piers

Tip: Create piers using four AB® Courtyard corner blocks. Ensure the longside of the block is facing out.

First and odd courses

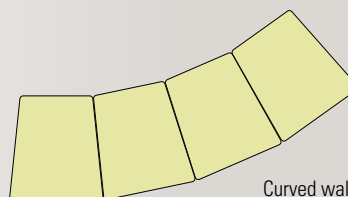

Second and even courses

AB® Courtyard Cap

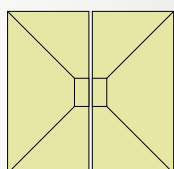

Straight walls

Curved walls

AB® Courtyard Pier Cap

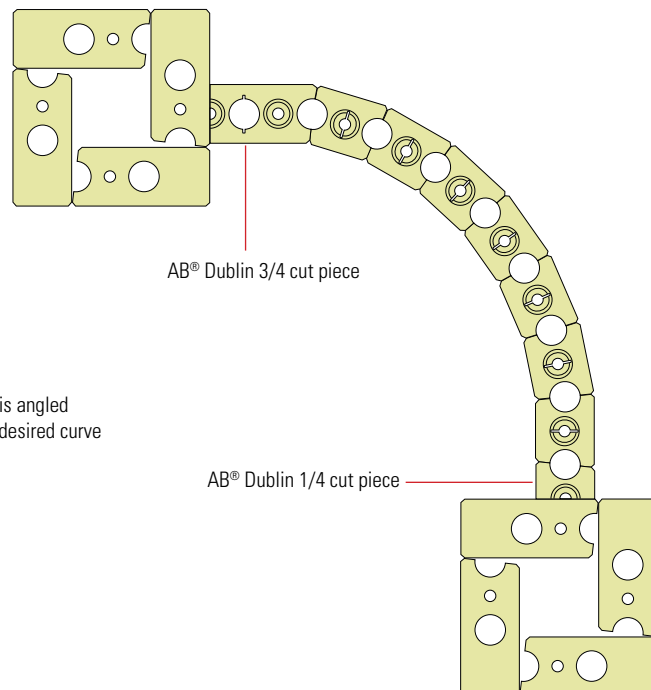

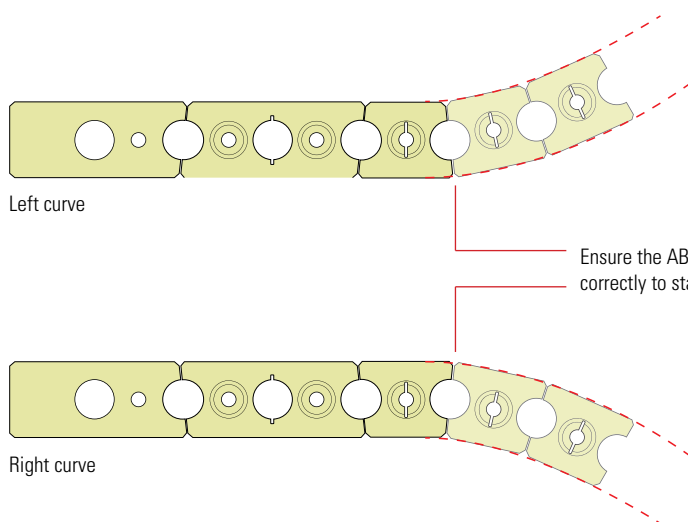

Two AB® Courtyard Pier Caps per pier

Quickly determine how many blocks and caps you need as well as any cutting instructions with the FREE AB® Courtyard App! Scan here using a QR reader or download in the App Store!

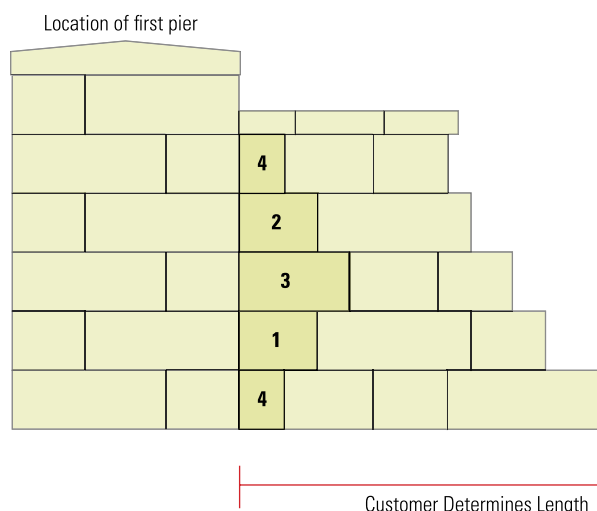

CREATING CURVES

Use AB® Courtyard York Blocks to create curves! Use these blocks faced the other way to straighten curved walls! Always take note of the 'long face' and 'short face' when curving or straightening walls!

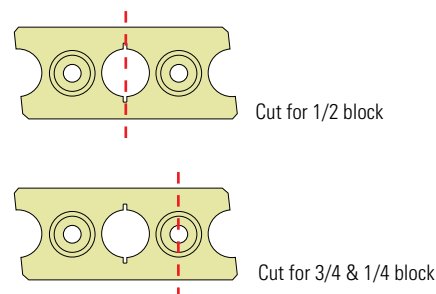

STARTING AND FINISHING WALLS

To start and finish walls between AB® Courtyard piers, you will use cut Dublin blocks to give you a flush professional finish!

For most aesthetically pleasing look, randomly use both AB® York blocks and AB® Dublin blocks throughout the main wall.

1. AB® Dublin 1/2
2. AB® Dublin 1/2
3. AB® Dublin 3/4
4. AB® Dublin 1/4

CIRCLES FOR FIRE PITS, FEATURES AND PONDS!

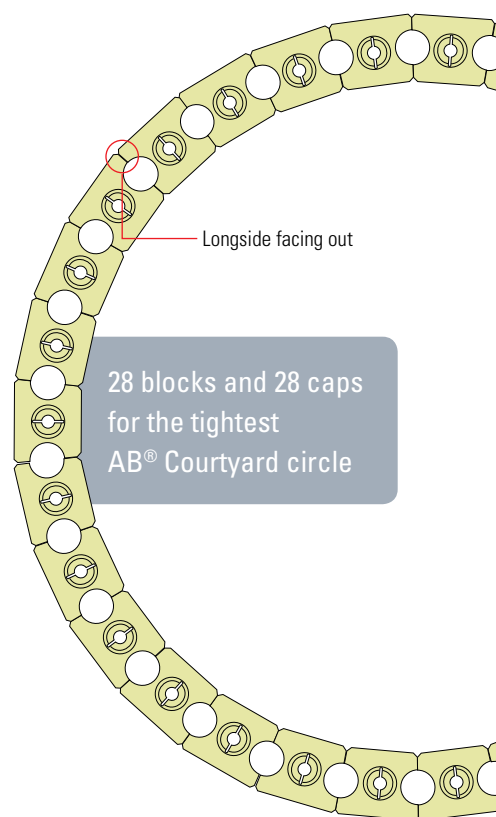

AB® Courtyard circles can be created using 28 York Blocks. Simply identify an area and if on soil, dig out the space and compact with roadbase before screeding level. If you're building onto an existing flat pavement, just begin laying blocks!

Lay the first York block and with the long side facing out, continue laying. The angled blocks will create a curve until the circle is complete! Some manoeuvring may be required to fit the last block into place – slightly open the circle to ensure a neat fit. Lay courses atop and cap to finish!

FINISHING AND CAPPING WALLS!

There are two types of caps for AB® Courtyard walls. Firstly, the standard wall cap which should be laid in the above pattern for straight or curved walls! The AB® Pier Cap is a 2 part cap for AB® Courtyard piers! The TOP of the cap has a raised point, be sure to lay the correct side up! Secure all caps in place atop of walls using a landscape grade adhesive.

Note: Some cutting may be required for caps, while this is common for retaining walls, always use appropriate PPE and use cutting equipment with care!
